CABLE ROUTING

WYE and TEE heat shrinkable boot transitions for cable management and routing solutions

Glenair Series 77 heat shrinkable transitions provide cable designers with complete flexibility and versatility in cable routing and harness design. Wye, Tee, and Breakout transitions are available. Wye and Tee transitions come in low-profile and widebody versions (for larger cable diameters), these environmental transitions reduce cable assembly time and provide turnkey sealing and routing in multi-legged harnesses. Available in eight material types, including Viton® for continuous exposure to caustic chemicals and fuels. Our popular Type 1 high-performance elastomer is ideal for extreme temperatures with excellent resistance to fuels and oils, and can be ordered in one of ten optional color choices.
