

Conductive dust caps for HiPer-D® connectors
289-052

CONDUCTIVE DUST CAPS

Black plastic conductive dust caps fit HiPer-D® and M24308-type D-subminiature connectors. Molded in conductive polyethylene copolymer (EVA), these caps provide electrostatic discharge protection to sensitive equipment. 140°F maximum service temperature. These caps meet the static decay requirement of MIL-PRF-81705. Surface resistivity is less than 1 x 10⁵ ohms/square. Integral lip allows easy removal.
