

SERIES 80 **Mighty Mouse Contacts and Tools**

Recommended Shielded Twisted Pair Termination to Size #23 Contacts

STEP 1

Strip jacket back .400" Max. If pair is unjacketed, install shrink tubing .400" Max from end of wires.

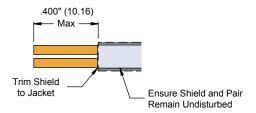

STEP 3

Install #23 crimp contacts included with connector per recommended installation procedure.

STEP 2

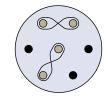

Trim shield back to jacket. Ensure that wires do not become separated underneath jacket.

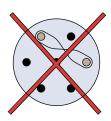

Insert contacts into adjacent cavities of high-speed mighty

mouse connector with rear grommet removed (MOD-422B).

STEP 4

Install Pair Into Adjacent Cavities

lenair

Avoid Installing Pair Into Non-adjacent Cavities

STEP 5

Assembled view

Install #23 Crimp Contacts
