

SERIES 801 DOUBLE-START ACME THREAD Mighty Mouse Connectors and Cables

PCB Receptacle with PC Tail Contacts and Ground Pins

Series 801 PC Tail Receptacle with Ground Pins

Ground pins are pressed into the shell body to provide a direct grounding path from the connector shell to the PCB board creating a common ground path for the connector, the panel it is mounted against and printed circuit board. Modified double-start stub ACME mating thread for improved protection against cross-mating and thread damage. Two shell styles — jam-nut or square flange, available. PC tail contacts for attachment to flex or rigid circuit boards.
