## Complete Convenience in MIL-DTL-5015 Type Connector Assembly: Every Contact, Tool and Accessory for the Job—No Gaps

### One-Stop-Shopping

Glenair is pleased to offer our ruggedized power and signal connector customers complete convenience in assembly tool procurement for our Series ITS and other MIL-DTL-5015 type products. We selected the best available assembly tools and equipment for the job, including manual and pneumatic crimp tools, durable contact insertion and removal tools and all the smaller tools and accessories required for efficient assembly and termination of these crimp-contact environmental connectors.

Please note: Glenair Series ITS Connectors are supplied standard with silver plated contacts. For gold contacts or other product modifications, please contact the factory.
