* TG70 Not Recommended For Values of 120 Inch Lbs. or Greater.

- ### VARIANCE CHART NOTES
- Recommended installation torque is approximately 80% of MIL-C-85049 accessory thread strength values.
 - Heavy duty installation torque values may be difficult to attain with the TG70 Strap Wrench; the values shown in brackets [] are the maximum attainable with the TG70 Strap Wrench using a single wrap.
 - Glenair recommends using 600 series torque tools whenever possible. When torque loading exceeds 75 inch pounds, or to attain the heavy duty torque values shown, a double wrap strap provides suitable friction to achieve torque values.
 - Glenair recommends that heavy duty torque values be directly read through the connector shell body with the use of 600-005 connectors holding tools.
