*40G ETHERNET AND SUPERSPEED USB* **TECHNOLOGY**

SUPERFLY DATALINK

The High-Speed Ultraminiature Connector for Harsh Environments

High speed, harsh environment SuperFly® Datalink connectors—optimized for 10Gb Ethernet and SuperSpeed USB protocols—save significant size and weight. Suitable for aircraft avionics, weapons systems, satellites, radars, communications equipment and other aerospace/defense gear, Octaxial SuperFly® Datalink connectors bring superior EMC shielding, environmental protection, and signal integrity to mission-critical mil-aero applications.

Quick -disconnect "push-pull" versions are ideal for tactical gear. Threaded-coupling versions are intended for aircraft and space-grade applications where secure mating is a requirement.

SuperFly Datalink White

Up to 40G Ethernet

SuperFly Datalink Blue

SuperSpeed USB

SuperFly Datalink Red

HDMI, DisplayPort, and SATA
