NOTES

- Materials And Finishes (As Applicable):
 - Shell - See Table I
 - Insulator - High Grade Rigid Dielectric.
 - O-Ring - Silicone.
 - Contacts - Copper Alloy/ Gold Plated (w/ SST Skt Hood)
 - Seals - Fluorosilicone Blend.
- Glenair 234-213 Series connectors savers are designed to mate with any QPL manufacturer's MIL-DTL-38999 Series IV connectors with same size insert arrangement and polarization.
- Insert arrangement in accordance with MIL-STD-1560. Contact factory for additional insert arrangements.
- Alternate polarization "U" (Universal) is a non-standard/ non-mil-spec option which allows for mating to any QPL manufacturer's MIL-DTL-38999, Series IV connector having the same shell size, insert arrangement and mating contact size. Universal connectors are intended for use in testing facilities only and should be highly evaluated before consideration in another environment.
- Power to a given contact on one end will result in power to a contact directly opposite, regardless of identification letter.
- Electrical safety limits must be established by user. Peak voltage, switching surge, and transient etc, should be used to determine the safety application.
