

SERIES 962

# HIGH-PERFORMANCE COAXIAL CABLE

*MIL-C-17 QPL and commercial*

**G**lenair high-performance Coax cables are constructed with silver plated conductors, insulated with fluoropolymer material, and finished with single or double layers of conductive shielding and appropriate jacket. Ideally suited for demanding military and commercial aerospace applications, these cables offer stable, predictable electrical performance under rugged mechanical and environmental conditions including repeated flexing, abrasion abuse, vibration, extreme temperatures, and exposure to aerospace fluids and chemicals. Glenair cable and contact engineers are available to review specific program requirements including environmental challenges, frequency requirements, loss budget, VSWR, and so on to select the most appropriate cable for every application.
